UPDATE SCREENS	(9/10) Key Route On / Under		N/A
INQUIRY SCREENS	(15/16) Key Route On / Under		(13/14) Key Route On / Under

DESCRIPTION AND PURPOSE OF ITEM

This item provides the method whereby the route specific data items can be extracted from the IRIS file and thus eliminates a duplication of entry. When the Key Route and station on ISIS match a Key Route and station on IRIS and the link indicator is set to 'Y' (YES); the following items will automatically transfer from IRIS to ISIS:

ISIS Item numbers: 3A, 3A1, 4, 5, 10A&B, 25, 26, 29, 30, 53, 54B1/B2, 104, 109 & 110.

CODE AND SCREEN ENTRY INSTRUCTIONS

A one-digit field.

Code

Description

- | | |
|---------------------------|--|
| Y
N
X ^{1/} | Key Route 'is Linked' to IRIS file
Key Route 'is not Linked' to IRIS file
Key Route 'is not Linked' because IRIS file indicates that the road is not open to public travel. This may be due to the route does not exist or the stationing is beyond the end of the |
|---------------------------|--|

Enter the letter 'Y' when attempting to link the ISIS Key Route to the IRIS Key Route. Linking should be accomplished using the 'ADD' function for those transactions where the Key Route screen is being initially created. Use the 'CHANGE' transaction when changing from Not Linked (N) to Linked (Y).

When attempting to link, a value must be entered in the field CNTY/MUNI: (found directly below the structure number). When linking a Key Route (other than a municipal street), the three-digit inventory county for the Key Route must be entered. For municipal street Key Routes, code the four-digit municipality code.

^{1/} NOTE: The code 'X' will appear whenever attempting to link an IRIS Key Route that is coded 'NOT OPEN TO PUBLIC TRAVEL'. This indicates that linking should not occur. The 'not open' status on the IRIS file will have to be changed to allow for linking, or the link indicator on ISIS should be changed to 'N'. An indicator of 'X' is not considered valid and should always be changed.
